2. The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

4. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims	1-85	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-85	NO
Industrial applicability (IA)	Claims	1-85	YES
	Claims		NO

2. Citations and explanations

None of the documents cited in the search report discloses the subject matter of the present application. Therefore, claims 1-85 are novel (PCT Article 33(2)). The present application (claims 1-85) does not appear to involve an inventive step (PCT Article 33(3)) for the following reasons:

The subject matter of the present application is the preparation of compounds having a very strong affinity for melatonine receptors and/or a selectivity for one of the melatoninergeric receptor sub-types. Among the compounds of the prior art, D1 (EP-A-0 530 087, page 2) and D2 (EP-A-0 728 738, pages 2-4) appear to be the closest. On the basis of D1 and in light of D2, it is obvious for a person skilled in the art to produce the present compounds.

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

The term "etc" and the symbol "... " (page 9) are not clear
(PCT Article 6).
